To Whom it May Concern:

RB Health Partners, Inc. has been a valuable partner of Advanced Healthcare Management for the past 10 years. Advanced Healthcare Management engaged the services of RB Health Partners to assist us in maximizing outcomes and staying in full compliance with all Medicare rules and regulations. Our company owns and manages LTC facilities throughout the deep south. We have been successful in achieving our mission of providing leading-edge care with exceptional outcomes, in part, due to the work of RB Health Partners.

Through the years RB Health Partners, particularly our primary consultant Nathan Shaw, RN, BSN, MBA, HCRM, RAC-CTA, has worked with virtually all of the facilities of our growing company, helping us to navigate the ever-changing waters of the Medicare Reimbursement System. Nathan has exceptional knowledge and skills of the system and always stays in tune with what is going on at the state and federal level.

When the Medicare reimbursement system changed drastically from the old RUGs to PDP, Nathan guided us through the entire process, ensuring we had a solid understanding of the new system. His consulting and support allowed us to manage through that change with very little difficulty.

RB Health Partners are truly that, partners. They are more than a paid vendor providing a service. They get to know your organization and understand your mission and goals. This allows them to service your account with dedication, expertise and excellence that is above and beyond expectations. It is with full confidence that I recommend Nathan Shaw and RB Health Partners to your organization.

Sincerely,

Brien B. Hubbard, CEO
