

NIPP: Nursing Home Infection Prevention Program...*Nipping Infections in the Bud*©
McGeer Surveillance Criteria for Long-Term Care Facilities 2012
Conjunctivitis

1. Does the resident have at least **1** of the following signs/symptoms?

Yes No

Pus appearing from one or both eyes, present for at least 24 hours

New or increased conjunctival erythema, with or without itching

New or increased conjunctival pain, present for at least 24 hours

If the answer is yes, then document infection in surveillance records.
